ROBOTS

COMBINED
ROBOTS

DINO POWERS SYNOPSIS (SEASON 1,2)

In the not-too-distant future, **rapid advancements in science and technology** have enabled people to bring dinosaurs back to life through genetic engineering, raising them as pets. Among these people is Choigang, an ordinary elementary school student who lives with his adorable dinosaur, Tyranno, as if they were family.

One night, a **cube** flies in through the window, knocking softly, and emits a brilliant light before transforming into a bracelet that wraps around Choigang's wrist. He soon discovers that the power of the cube bracelet can **transform Tyranno into a mechanical dinosaur** and that special goggles allow him to see **Cymon**, creatures that blend into human society to cause trouble and accidents.

In a world where dinosaurs and humans coexist and a parallel universe inhabited by monsters, four chosen heroes, brought together by the cube, form the **<Dino Powers>** to combat these monsters and **thwart Anti's plan** to dissolve the boundaries between the two worlds.

This version keeps the focus on the transformative cube, the mechanical dinosaur, the threat posed by Cymon, the formation of the Dino Powers, and the main conflict with Anti.

DINO POWERS SYNOPSIS (SEASON3)

After the Dino Powers vanquished Anti, Dino City has enjoyed peace. However, a **mysterious flying object lands in Dino Land**. Sent from the planet Toy Star, they form an invasion squad with a mission to **harness the stress energy of Earth's inhabitants**.

Burying themselves underground, they merge with the Undermons. Using these creatures, the squad plunges humanity into chaos, to cause incidents and accidents.

In response, Lucy sends a **new code to Choigang and the children**. Their goggles display new energy flows, enabling them to **summon the mechanic "Dino Metrics"**. Engaging in a battle with the monster Undermons, the Dino Metrics eventually overcomes them. Thus, the Dino Powers **continue their fight to protect Earth**.

This revision emphasizes the arrival of the new threat, the innovative solution provided by Lucy, and the overarching goal of the Dino Powers to safeguard Earth, making it clear what the main focus of the story is.

DINO POWERS CHARACTER

Tyranno

Choigang's pet

CHOIGANG

A 12-year-old boy brimming with a sense of justice and overly energetic. He often makes mistakes or causes inconvenience to others. He has little interest in academic achievements but makes an effort to be diligent in school life. He can be stubborn, but as he faces monsters alongside the Dino Powers members, he learns the value of teamwork.

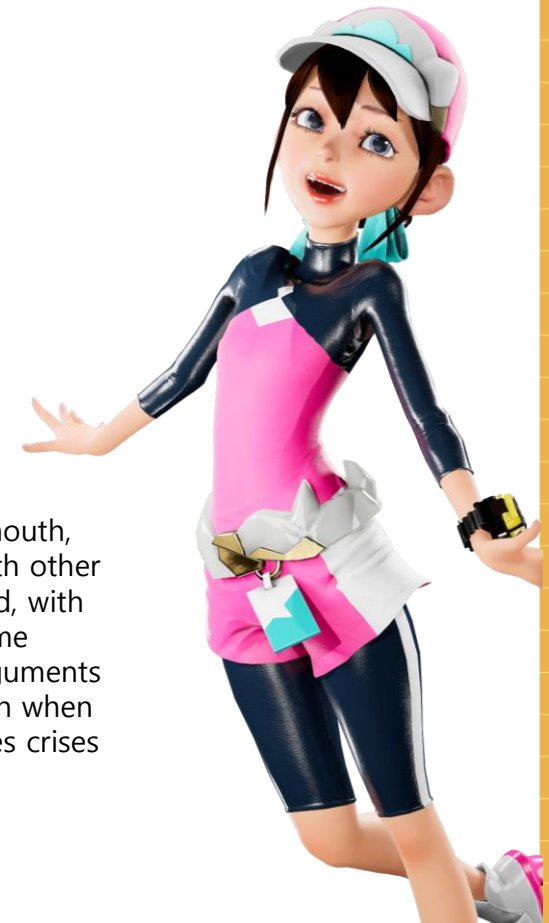

Trice

Bandi's pet

BANDI

Despite her pretty face, she is quite a loudmouth, which makes it hard for her to get along with other girls her age. As Choigang's childhood friend, with whom she grew up playing house in the same neighborhood, she often gets into fierce arguments with him. She may struggle with her strength when facing powerful monsters, but she overcomes crises with her ingenious ideas.

DINO POWERS CHARACTER

ANKYLO

Siwon's pet

SIWON

A 12-year-old boy who is always calm and quiet. Perhaps for this reason, he is quite popular among girls. Occasionally, he shows a goofy side by cracking dry jokes. Unlike Choigang, who is often led by his emotions, he always thinks and acts rationally and cool-headedly. Although he is not the strongest physically, he combats monsters by identifying their weaknesses with his sharp judgment.

BRACHI

Donghae's pet

DONGHAE

A 12-year-old who is overweight, slow-moving, and easily frightened. He has a strong appetite but is quite selective about what he eats—a true gourmet in his own right. He constantly seeks out food, to the extent that he struggles to exert any energy in battle without his snacks, even when fighting monsters. Although he is often scared, he has the ability to deliver a crucial blow at critical moments.

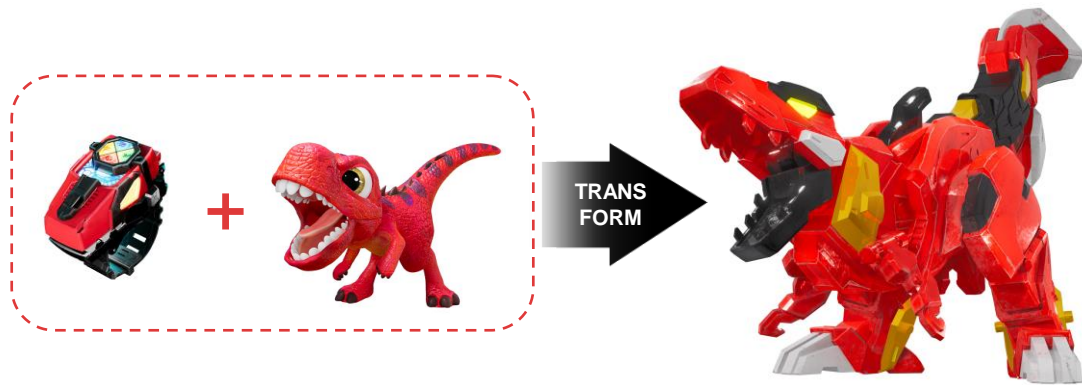

DINO POWERS CHARACTER

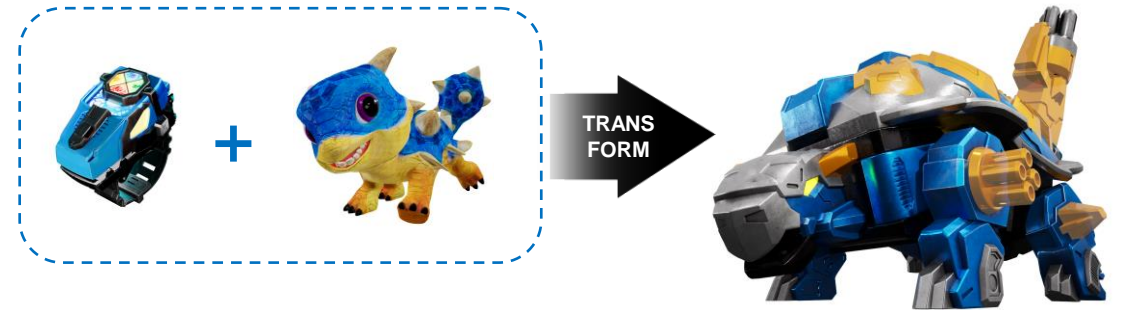

LUCY

At 13, she is the sole granddaughter of Professor Cube, the creator of MetaDino and MetaBot, and the youngest engineering Ph.D. She may seem aloof, but she has a bright and cheerful personality when with friends.
