Casting & Characters

Nano fighter **LOKAPA**

Nano fighter LOKAPA-RED

The leader of the Nano fighter.

Kim Min-hyuk

Born in Seoul, 20 years old.

He is interested in robotics, nanotechnology and biology. He is good at martial arts and enjoys imitating Bruce Lee. He is lively and well-behaved, and quickly becomes friendly with people he meets for the first time, but he hates losing more than dying, and he often shows a hot-blooded bombast that puts actions ahead of words.

No matter how difficult the situation may be, it also shows an indomitable will to resolve the situation at all costs.

He transforms into LOKAPA Red, unleashes his superpowers with the help of Red Opal, and subdues the virus monster with his extreme yam sword.

LOKAPA Red – Weapon / Transformer Gear

Sword of Virus-Killing

Shape : Broadsword type with a wide blade. The hilt is made longer so that it can be handled with either one or two hands. Pommel is studded with a piece of Gaia, which increases the conductivity and synchrony of X Power. The blade does not stand, but it changes sharply as the X Power unfolds.

function : The sharpest of the weapons. When 'X Power' is triggered, the blade causes a vibration reminiscent of the roar of a beast, and a geometric pattern appears in the center of the blade. At this time, the cutting force is 5 times better than when it is not activated, and because it vibrates at a very high speed, it cuts off the protein structure of the variant virus in an instant.

Special Moves : Tiger Slash

It is a technique in which he carries the Yam Sword, which is granted by maximizing the metal and anticipation of the Red Opal, and grazes the opponent at a very high speed and performs dozens of powerful slash attacks

Transforming Gear

X-Red's transformation tool made by collecting red opal crystals.

It is usually used as a means of communication using stereoscopic holograms and for data retrieval

Red Mask

feature : When the virus attacks, it summons a mask to fend off the virus attack. Wearing the mask amplifies the power of the LOKAPA fighter, and when transforming into a LOKAPA fighter, pressing the transformation gear and touching the side of the mask transforms into the Nanofighter LOKAPA.

Nano fighter LOKAPA-BLUE

Lee Jae-yoon

Born in Incheon, 20 years old

He has a genius for physics and mathematics.

Kickboxing enthusiasts who love Badahari.

He is often mistaken for a cold or poisonous speaker because he does not show his emotional changes outwardly, and because he uses a style of speech that directly pierces the core rather than speaking out of consideration for others. He clashes with his brother over who is stronger between Bruce Lee and Bada Hari, but he is envious of his optimistic and sociable personality, and gradually turns into a cheerful personality as he learns to get along with people through his brother.

He transforms into LOKAPA Blue, unleashes his superpowers with the help of Blue Sapphire, wields the invincible Thunderdragon Unwaldo, and subdues the virus monster.

LOKAPA Blue – Weapon / Transformer Gear

Falchion of Thunder Dragon

Shape : Polearm type with a large blade.

At the part that connects the blade to the stand, the image of a dragon head is carved out of the blade. A piece of "Gaia" is embedded in the corner of the dragon's mouth like a female lady. When the 'X Power' is triggered, the pieces synchronize, and a lightning strike occurs. The sharpness of the blade is inferior to that of the "sword", but it is metallized and increases in weight to deal with enemy variant viruses.

Function : Because it is a heavy weapon, it is difficult to make a dazzling attack, but it can aim for a strong shot. When the superpowers are activated, the lightning strike can paralyze the movement of the variant virus. Due to the characteristics of its shape, it can cover a wide range and can attack not only with a blade but also with a boulevard.

Special Moves : Dragon bash

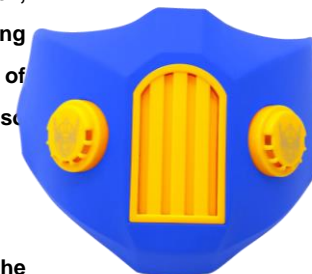

It is a technique that inflicts a powerful blow on the opponent by wielding the Thunderdragon Unwoldo, which gives the maximum power of the lightning battle possessed by the Sapphire, and because of the weight of the Unwoldo itself, it does not stab or slash, but has a stronger feeling of crushing the opponent.

Transforming Gear

X-Blue's transformation tool made by collecting blue sapphire crystals.

It is usually used as a means of communication using stereoscopic holograms and for data retrieval

Blue Mask

feature : When the virus attacks, it summons the mask to block the virus attack. Wearing the mask amplifies the power of the LOKAPA warrior, and when transforming into a LOKAPA warrior, pressing the transformation gear and putting your hand next to the mask transforms into the Nanowarrior LOKAPA

Nano fighter LOKAPA-PINK

Ha-ram Lee

Born in Busan, 20 years old.

A archer called as the shrine.

She usually seems to be a heavenly woman with a polite way of speaking and a neat personality, but when she bumps into her playful brother-in-law, she loses her usual pace and often gets into a fierce argument while using a strong Busan dialect. However, he is a happy virus evangelist who has a good heart and occasionally entertains his surroundings with his wacky comments as he takes care of his sons with his one and only Hongil point.

She transforms into LOKAPA Pink, unleashes her superpowers with the help of Pink Diamonds, and uses her Chloride Palace to unleash flame arrows to subdue the virus monster.

LOKAPA Pink – Weapon / Transformer Gear

Bow of Blaze

Shape: Basically, it is in the form of a bow, but there is no demonstration. However, a piece of "Gaia" is built into each end (unlike other weapons, it is not visible; when it is fired with an arrow, it transmits propulsion in conjunction with the superpower.

Function : The only injection-type ranged weapon. Since it does not require tension, muscle strength does not affect it much, but it requires a relatively high concentration level because it requires East Sea the power of superpowers. When the superpower is activated, the assigned arrowhead is filled with flames, and when the entire arrow is wrapped in flames and fired with a high degree of concentration, it causes a deadly explosion.

Special Moves : burst

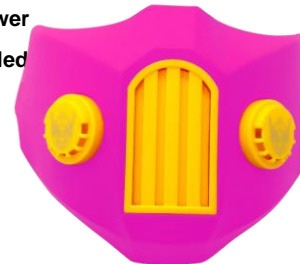

It is a technique that fires arrows that give the maximum power of pink diamonds to suppress the opponent with the power of powerful fire carried by each arrow fired.

Transforming Gear

X-Pink's transforming tool made by collecting pink diamond crystals.

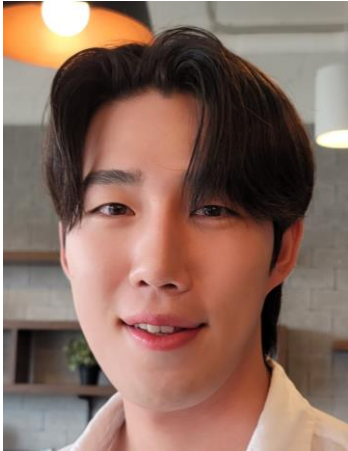

It is usually used as a means of communication using stereoscopic holograms and for data retrieval

Pink Mask

feature : When the virus attacks, it summons a mask to block the virus attack. Wearing the mask amplifies the power of the LOKAPA warrior, and when transforming into a LOKAPA warrior, pressing the transformation gear and putting your hand next to the mask transforms into the Nanowarrior LOKAPA

Nano fighter LOKAPA – JADE

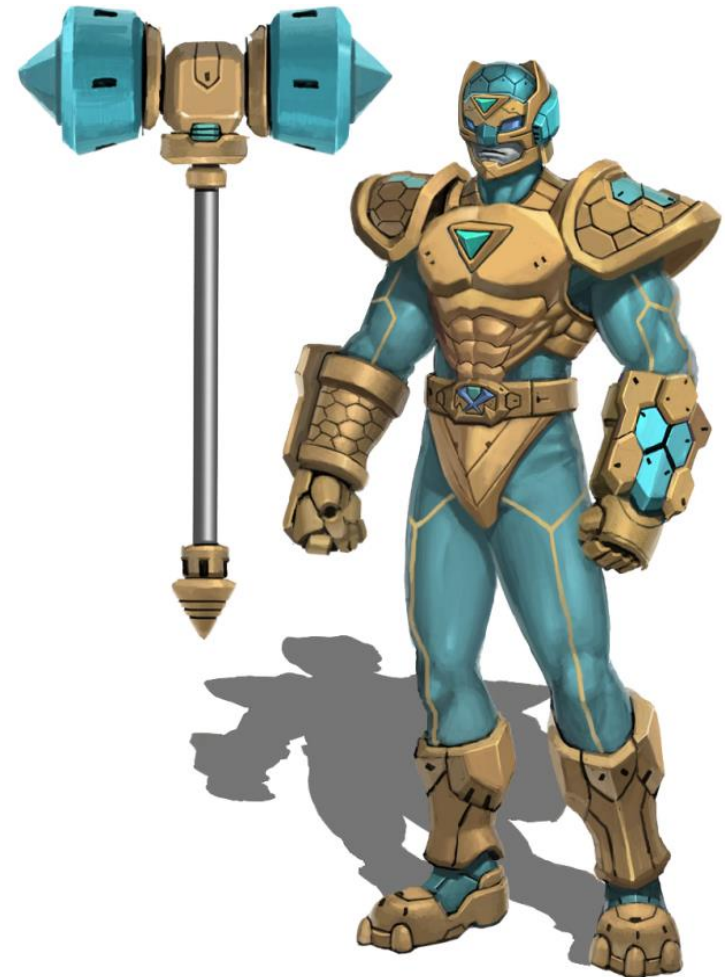

Lee Sang-hyun

Originally from Gangneung, 20 years old.

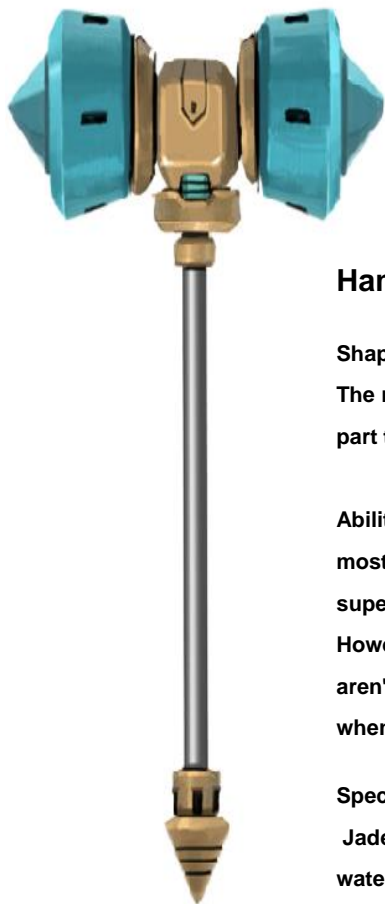

A wrestler with a strong physique for his age.

He enjoys reading and listening to music and can't say a word in front of women. He often mediates arguments between team members or counsels them about their problems, but when dealing with viruses, he turns into an unrecognizable force and becomes an object of fear.

Transformed into LOKAPA Jade, he unleashes his superpowers with the help of Jade Jadeite, and wields a powerful wave weight that overpowers the surroundings at once to subdue the virus monster.

LOKAPA Jade – Weapon / Transformer Gear

Hammer of shell-breaking

Shape : The head of a huge hammer has pointed cones on either side.

The material that makes up the hammer is a special teranial synthetic resin, but the part that protrudes in the form of a cone is a fragment of "Gaia".

Ability : Of all the weapons, Gaia has the largest proportion of fragments and the most powerful in terms of actual destructive power. Even if you don't activate your superpowers, you can deal a serious blow to a number of variants of the virus. However, it attacks just as slowly, and it keeps its balance because its superpowers aren't as aggressive as other Jewels. It is unclear what kind of power it will exert when the synchronisation reaches its peak.

Special Moves : Turtle smash

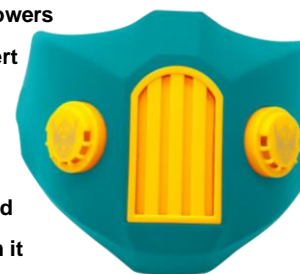

Jade's maximum power is used to collect the surrounding water to form a solid water barrier like a turtle's shell, trap the opponent, and then jump up and slam it down, destroying the opponent's solid defense at once as well as destroying the weaker opponent at once.

Transforming Gear

Jade's transformation tool made by collecting Jade jadeite crystals.

It is usually used as a means of communication using stereoscopic holograms and for data retrieval

Jade Mask

feature : When the virus attacks, it summons the mask to block the virus attack. Wearing the mask amplifies the power of the LOKAPA warrior, and when transforming into a LOKAPA warrior, press the transformation gear and put your hand next to the mask to transform into the Nanowarrior LOKAPA

Ukaka : Virus Commander-in-Chief

Beginning as a quasi-intelligent body that brings together the instincts and impulses of all viral races.

It is now transformed into a complete being with its own personality and intelligence as a living being of its own.

He creates two staff members, Haku and Seka, and seeks to regain control of humanity and the Earth.

In 2021, the new virus produced so far spread to the entire planet,

Among them, we will intensively infect children with the strongest growth energy and begin full-fledged activities to conquer humanity and the earth once again

■ Choi Hong-man

Haku – Ukaka's Action Captain

As Ukaka's chief of staff, he is in charge of the task of robbing infants and toddlers of their growth energy and transmitting them to Ukaka, and he is very resourceful in terms of resourcefulness, conceiving and executing various operations that even the hero team members could not predict.

However, the operation is repeatedly failed by the heroes, and every time he is reprimanded by Ukaka, he shudders with anger and vows to take revenge. After stealing some of the variant virus without Ukaka's knowledge, he is secretly trying to conduct some kind of experiment on the frontier, but no one knows anything about the experiment except himself, so it is difficult to understand what he is aiming for.

When he transforms into a humanoid for a mission, he always insists on wearing a suit, and although he impresses and weighs in front of humans, he is repeatedly

■ Kim Deok-Hyung

SEKA ; Ukaka's General Staff

Ukaka's chief of staff and creation

With a mature and sophisticated appearance, it is the closest to a humanoid.

She is trusted by Ukaka and serves primarily as a rear support, cultivating variants of the virus herself or crafting capsules containing the macrovirus, but when the situation is unfavorable, she sometimes goes into battle using a commendation and a dagger as her primary weapon.

She has a high combat power that is as high as that of Nanofighter heroes, but she has very high emotional ups and downs, so even if she tries to fight first, she often disappears with the words that she is not funny, which is also a nuisance for Ukaka.

Also, she hates Haku for laughing at herself.

She is so close to humanoid that she doesn't need to transform into a humanoid and is a fashion and accessory collector.

■ Kim Iru

Virus Monster – Zoo Beasts

An animal that was exposed to a mutant virus due to Ukaka's ruse and became a virus monster !!!
